

**FTSE KLD 400 Social Index
out-performs S&P 500**
April 1990 – March 2010

KLD400 Cumulative Performance as of March 31, 2010

The **FTSE KLD 400** (formerly the **Domini Social Index**, or KLD 400) for two decades has been an apples-to-apples comparison to the S&P 500 Index – but with a broad range of social and environmental screens applied.

During this time its performance has virtually mirrored the S&P 500, but with a small margin of out-performance – which dispels the myth that the use of social & environmental screens (SRI / ESG investing) leads to lower returns.
